

Live Scoring Addendum

The reviewed curriculum policy and the scoring override used during the 2026 live event are different provenance layers.

Do not silently combine these policies. The original reviewed kit remains the source for the planned curriculum. This addendum records later live-event decisions preserved by the historical website and leaderboard.

Original reviewed kit

Each primary activity is scored out of 100; the best 9 of 12 primary scores count.

2026 live-event override

Ordinary entered scores are 0 to 100; the lowest $\text{floor}(n / 4)$ non-CRANK entries are canceled. CRANK always counts separately.

LIVE CALCULATION

- Validate every ordinary station entry from 0 through 100 points.
- For each team, set aside CRANK. Sort all other entered scores and cancel the lowest $\text{floor}(n / 4)$.
- Count CRANK in full. It is never eligible for cancellation.
- Tickets are a separate participation currency and never change leaderboard points.

CRANK CHAMPIONSHIP

Three judges score five categories from 0 through 10: motion, reliability, engineering, aesthetics, and pitch. Double the card total.

$3 \text{ judges} \times 5 \text{ categories} \times 10 \text{ points} \times 2 = 300 \text{ points maximum}$

LIVE ADDITIONS AND REPEATED ACTIVITIES

The operational schedule uses distinct score keys where needed: PYS-00 is the scored Card Tower Kickoff; PYS-02R is the Oobleck rematch while its resource code remains PYS-02; CRANK is the championship; and PYB-05 is the live-added Code Break Cipher Relay. An entry affects standings only when a team score is actually recorded.

OPERATOR RULE

Choose the reviewed-kit policy or the 2026 live policy before calculating a leaderboard. The website's Admin console and historical standings use the live policy above. Use the original score sheets only for the reviewed best-9-of-12 format.
