

Center-of-mass map template

For each of the four challenges, sketch the body in its box, mark the center of mass with an X, draw the line of gravity straight down, and shade the base of support (where you touch the floor). Balanced = the line of gravity falls inside the base.

CHALLENGE 1 – WALL AND HEEL

Mark your center of mass with an X. Draw the straight line of gravity down from it. Does the line land inside the base?

CHALLENGE 2 – BACKLESS CHAIR STAND

Mark your center of mass with an X. Draw the straight line of gravity down from it. Does the line land inside the base?

CHALLENGE 3 – TOE GRAB HOP

Mark your center of mass with an X. Draw the straight line of gravity down from it. Does the line land inside the base?

CHALLENGE 4 – LOADED LINE WALK

Mark your center of mass with an X. Draw the straight line of gravity down from it. Does the line land inside the base?
