

Daily voltage log

Each day, set the multimeter to DC millivolts and read the voltage across the 100 kΩ resistor at the same time; the cell is weak on day 1 and climbs as the biofilm grows. Defend the design with the trend, not one number.

Team _____ The ONE variable we are testing _____

DAY	TIME	VOLTAGE (mV)	NOTES
Day 1 (Mon)			
Day 2 (Tue)			
Day 3 (Wed)			
Day 4 (Thu)			
Day 5 (Fri)			
Peak reading		Day of peak
