

Heart-rate recovery log

Use the radial pulse at the wrist only; never take a neck pulse. With consent, count twice for 15 seconds at each time point. Average bpm = (Trial 1 count + Trial 2 count) × 2. Plot that average. Light activity and measurement are optional; follow any health-plan or staff restriction. Stop immediately and tell an adult for dizziness, chest pain, unusual trouble breathing, or feeling unwell. This classroom trend is not a fitness or medical test.

WHEN	TRIAL 1 COUNT (15 S)	TRIAL 2 COUNT (15 S)	AVERAGE BPM (SUM × 2)
Resting (sit calm for 1 min)			
Right after 1 min of activity			
Recovery at 1 minute			
Recovery at 2 minutes			
Recovery at 3 minutes
