

Checkpoint clue cards

Cut the cards apart. Follow only the staff-marked route to each named collection area. Match the numbered field tag, record the approved tree name, and use the evidence key to document the feature you observed. If a tag or label is missing, write **unverified** instead of guessing.

Checkpoint 1

token ○

Pinetum

South of the Learning Center, along Loop Drive

Staff tag or plant-label ID: _____

Tree name from the approved route key or label:

Evidence-key path: _____

The specific feature you saw: _____

Checkpoint 2

token ○

Oak Canopy

Southeast of the Ambler Research and Collaboration Building

Staff tag or plant-label ID: _____

Tree name from the approved route key or label:

Evidence-key path: _____

The specific feature you saw: _____

Checkpoint 3

token ○

Maple Canopy

Between the Ambler Research and Collaboration Building and the Learning Center

Staff tag or plant-label ID: _____

Tree name from the approved route key or label:

Evidence-key path: _____

The specific feature you saw: _____

Checkpoint 4

token ○

Aesculus Grove

North of Bright Hall and southwest of the Ambler Research and Collaboration Building

Staff tag or plant-label ID: _____

Tree name from the approved route key or label:

Evidence-key path: _____

The specific feature you saw: _____

Checkpoint 5

token ○

Columnar Copse

South of Widener Hall

Staff tag or plant-label ID: _____

Tree name from the approved route key or label:

Evidence-key path: _____

The specific feature you saw: _____

Checkpoint 6

token ○

Beech Grove

West of Dixon Hall, across the bluestone Accessible Path

Staff tag or plant-label ID: _____

Tree name from the approved route key or label:

Evidence-key path: _____

The specific feature you saw: _____

Adaptive field evidence key

This adaptive evidence key records visible traits; it does not prove a species name. Start at step 1, record the path you follow, then match the numbered field tag to the staff-approved route key or visible plant label. Staff may substitute a host-verified species key.

STEP	WHAT TO LOOK FOR	THEN
1a	Foliage is needle-like or scale-like	go to 2
1b	Leaves are broad and flat	go to 3
2a	Needles occur in bundles or clusters	record: bundled needles
2b	Needles attach singly, or foliage is scale-like	record: single needles / scales
3a	Leaves attach in opposite pairs	go to 4
3b	Leaves attach alternately along the twig	go to 5
4a	Each leaf has one blade	record: opposite + simple
4b	Each leaf has multiple leaflets	record: opposite + compound
5a	Each leaf has one blade	go to 6
5b	Each leaf has multiple leaflets	record: alternate + compound
6a	Blade has lobes	record: alternate + simple + lobed
6b	Blade has no lobes	record: alternate + simple + unlobed

Adaptive route plan

FIELD VERIFICATION REQUIRED. Before teams use this sheet, staff must prewalk the route with the Ambler host, confirm each numbered tag and plant label, mark the approved paths plus start/finish, and provide an alternate for any closed, uneven, or inaccessible segment. Temple notes that only portions of the gardens are accessible and some natural areas have uneven terrain.

Camp base / start / finish:

Approved checkpoint order:

Closed or no-go areas:

Accessible alternate(s):

The checkpoint positions below are a location schematic based on Temple's current map coordinates. **No walking paths are shown.** Use the staff-marked official visitor map and field markers for the actual route.

| 03 3. Maple Canopy — Between the Ambler Research and Collaboration Building and the Learning Center
Map check: 40.1661009, -75.1899147 | 06 6. Beech Grove — West of Dixon Hall, across the bluestone Accessible Path
Map check: 40.1655580, -75.1932590 |

Location names, descriptions, and coordinates: Temple University Ambler, **2026 Ambler Arboretum Visitor Map** and **Arboretum Text Map** (ambler.temple.edu/arboretum-text-map). Coordinates are for staff cross-checking, not permission to leave the marked route. Stay on designated paths, remain with your team, do not climb trees, and do not pick plant material.

Evidence tokens (cut apart)

Cut the tokens apart. Your team collects one token for each checkpoint you solve; 6 tokens means you finished the whole quest.
