

Glide test, target rules, and scoring target

Glide test (Glide performance, 30 points)

- 01 Tape a start line and a launch line 30 cm apart on a smooth floor or long table.
- 02 Set the inflated hovercraft on the start line, open the cap, and give it one firm, level push so it crosses the launch line.
- 03 Measure how far past the launch line it glides before it stops. Record the **best of three** pushes in centimetres.

Target hockey (Target competition score, 25 points)

- 01 Place the target sheet 1 to 1.5 m from a shooting line on the floor.
- 02 Each team gets **five shots**: push the hovercraft from the shooting line so it comes to rest on the target.
- 03 Score the ring the puck's centre stops on (5, 10, 20, or the 30 bullseye). Off the target scores 0. Add the five shots.
- 04 Run it as a bracket: highest five-shot total advances. Ties take one extra shot.

SCORING TARGET – PRINT AND TAPE TO THE FLOOR OR A TABLE
