

Maze boards (lamine; one per team)

Print on cardstock and laminate. The green square **S** is the start; the red target is the finish. Place a steel paperclip or washer (the "capsule") on S and move the 6 mm driver magnet UNDER the board to drag it to the target without touching the maze walls. Paths are kept wide on purpose — move the driver slowly. Pre-test each token through the laminated sheet before the run.

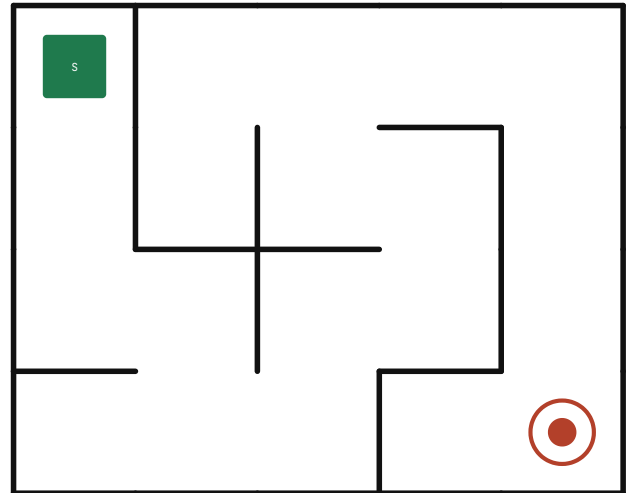

Maze A
