

Center-of-mass map template (sketch your prediction)

For each challenge, sketch the body in the box, mark the center of mass with an X, draw the line of gravity straight down, and shade the base of support (where you touch the floor). Balanced = the line of gravity falls inside the base.

CHALLENGE 1 – BEFORE

base of support (shade it)

Mark your center of mass with an X. Draw the straight line of gravity down from it. Does the line land inside the base?

CHALLENGE 1 – REDESIGN

base of support (shade it)

Mark your center of mass with an X. Draw the straight line of gravity down from it. Does the line land inside the base?

CHALLENGE 2 – BEFORE

base of support (shade it)

Mark your center of mass with an X. Draw the straight line of gravity down from it. Does the line land inside the base?

CHALLENGE 2 – REDESIGN

base of support (shade it)

Mark your center of mass with an X. Draw the straight line of gravity down from it. Does the line land inside the base?
