

Team decoder sheet

One per team. Part of the game is knowing which tool fits which code. A / separates words on a slip.

WAYS A MESSAGE HIDES

Shifted alphabet (Caesar): every letter slides the same number of steps; slide it back. **Mirror (Atbash):** A trades with Z, B with Y, C with X, and so on inward. **Backwards:** read the whole thing in reverse. **First letters:** take the first letter of each word. When a slip shows numbers, dots, or bits, use the tables below.
